

Bluetooth Program

It is a program designed for pre-teens in which there will be fun, learning and sports.

The scenography is divided into three sectors the central sector which is the bluetooth where the pre-teens can play music with the direction of a

The preteens are invited by one of them to participate through his social network and asks for the space to take him and his friends to the television where this program is made so that later in their homes they can get together with friends and have fun with them.

Thursday or Friday is scheduled or Saturday afternoons.

Then there would be the library with a scenery of books all around new ones and literature teachers doing workshops either to these same pre-teens or to another call within the same program which teaches them how to write and how to publish and which are the best places to publish where they are taught grammar and where they learn the writer's craft where there are contests and readings that then together form a book every week of different subjects.

also with invited from social networks like this Bluetooth then in a very quiet environment is passed every week there will also be the results of sales of books that are distributed and this encourages the study of preteens in a fun way and for others to see through television that they can do so even copy the model for their homes.

Then in the bluetooth program they all go out together to a kind of playground all within the same program to play sports and then they play

new sport that is called open pick volleyball because it can be played mixed and this is a mixed program as it is a normal school and high school and faculty.

So the final task is to have a teacher for each subject as we already have music, social work, literature, sports, if you want to expand the program, you can introduce other scenography, but I think that to start with it is fine and with the variants you want to do it and the most important thing is that the result is that

come studious generations who love sports, who have discipline and a taste for technology and the new form of communication, and also to get together at home by calling through secure social networks.

. Which these pre-teens will learn trades also that you can make a workshop leader who knows trades and do not forget that we can also teach theater and dance to copy a model of education according to these times. I make the clarification open pick volleyball can be found here among these files.

Then there will be the advertisers and participatory awards to the pre-teens per program once a week.

I propose driving by Mila Kunis (Greetings).
